KEY BUSINESS INSIGHTS

01

Lead-to-customer is the primary bottleneck

The funnel generates 34,328 leads, but only 5,289 become customers, resulting in an 84.59% drop-off at the Lead → Customer stage.

02

Top-of-funnel performance is comparatively strong

The Visitor → Lead conversion is 75.93%, indicating that the major optimization opportunity is further down the funnel rather than simply increasing traffic.

03

Education segments show different conversion performance

The tertiary education segment has the highest observed conversion rate at 15.01%, compared with 8.63% for primary education.

04

Contact method performance varies

Cellular shows the highest observed conversion among the contact methods analyzed, reaching 14.92% for the no-loan segment.

ACTIONABLE RECOMMENDATIONS

01

Strengthen Lead Nurturing

Focus on the Lead → Customer stage through better follow-ups, personalized communication and lead qualification.

02

Prioritize High-Performing Outreach

Test and optimize cellular outreach for qualified leads while continuously comparing conversion performance across contact methods.

03

Use Segment-Based Targeting

Develop targeted campaigns for higher-performing customer segments and test whether similar strategies improve lower-converting segments.

04

Improve Data Quality

Reduce Unknown categories in customer and campaign attributes to improve segmentation, targeting and future analysis.

Priority: Improve Lead → Customer conversion to generate more customers from existing leads.
